

Ein kurzer Lagebericht - und über Streikvorbereitungen

I wanna explain to you our situation in Leoni Ezzahra: we were 1200 persons in 2010 and we started producing one project of Fiat called Panda, but the Director of Leoni Tunisia Group moved it to Sousse (every plant is specialized in one customer): Ezzahra is specialized in Fiat, Sousse in German models like Mercedes BMW Audi, Mateur sites in French cars like Renault Peugeot, Citroen.

So if you see a Fiat model is moved from Ezzahra to other site so you must think that there's something wrong. There is something going wrong!

And he say in all tunisian media that the only customer of Ezaahra has no work to give to it and we must change to other plants! Why? If you take my eyes don't ask to see.

What I'm sure of it that Leoni in Germany have no idea about what happenning in Ezzahra or maybe they have the wrong version of the story.

I would like to give them the right version and another info: in our region we will do a strike and we have with us more than 90 firms!

It's not easy to take 600 family and move them to other places about 150 km we are like trees if you move it it will die.
